| 3 BCEA — a R package for Bayesian cost-effectiveness analysis | 61 |
| 3.1 Introduction | 61 |
| 3.2 Economic Analysis: the <code>bcea</code> function | 65 |
| 3.2.1 Example: Vaccine example | 67 |
| 3.2.2 Example: Smoking | 71 |
| 3.3 Basic health economic evaluation: the <code>summary</code> command | 72 |
| 3.4 Cost-effectiveness plane | 76 |
| 3.4.1 The <code>ceplane.plot</code> function | 76 |
| 3.4.2 <code>ggplot</code> version of the cost-effectiveness plane | 78 |
| 3.4.3 Advanced options for <code>ceplane.plot</code> | 82 |
| 3.5 Expected incremental benefit | 83 |
| 3.6 Contour plots | 87 |
| 3.7 Health economic evaluation for multiple comparators and the efficiency frontier | 91 |
| References | 95 |
| 4 Probabilistic sensitivity analysis using BCEA | 97 |
| 4.1 Introduction | 97 |
| 4.2 Probabilistic sensitivity analysis for parameter uncertainty | 98 |
| 4.2.1 Summary tables | 102 |
| 4.2.2 Cost-effectiveness acceptability curve | 103 |
| 4.3 Value of Information Analysis | 114 |
| 4.3.1 Expected value of perfect information | 114 |
| 4.3.2 Expected Value of Perfect Partial Information | 119 |
| 4.3.3 Approximation Methods for the computation of the EVPPI | 120 |
| 4.3.4 Advanced Options | 130 |
| 4.3.5 Technical options for controlling the EVPPI estimation procedure | 133 |
| 4.3.6 Deprecated (single-parameter) Methods | 139 |
| 4.3.7 The Info-rank plot | 142 |
| 4.4 PSA applied to model assumptions and structural uncertainty | 144 |
| 4.4.1 Mixed strategy | 144 |
| 4.4.2 Including risk-aversion in the utility function | 147 |
| 4.4.3 Probabilistic sensitivity analysis to structural uncertainty | 150 |
| References | 157 |
| 5 BCEAweb: a user-friendly web-app to use BCEA | 161 |
| 5.1 Introduction | 161 |
| 5.2 BCEAweb: a user-friendly web-app to use BCEA | 162 |
| 5.2.1 A brief technical overview of BCEAweb | 163 |
| 5.2.2 Note on data import | 163 |
| 5.2.3 Introduction to the interface | 164 |
| 5.2.4 Check assumptions | 165 |
